DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: Formula I to Formula III. The species are independent or distinct because the core moiety chemical structure contains constituents with groups that may induce variable properties, characteristics, and susceptibilities due to reactive groups contained in the specific group. For instance, the variable limitations disclosed in instant claim 1 require a further species election.
2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 33, 46, and 57 are generic to the claimed invention.
3. The species are as follows:
 4. a small molecule drug (claim 1) and a controlled release carrier (claim 46)
5. Applicants' must choose one specific small molecule drug (claim 1). For instance, a species of a small molecule drug as indicated in the instant specification is methotrexate.
6. Also, applicants' are required to elect from the species in instant claims 46 and 57. Applicants' are required to elect one particular species of a poly (lactide-co-glycolide) material. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
